Increased emphasis on ESG

Sustainability – an ever more integral part of our business

- Staying true to our heritage, we are firmly committed to making a positive difference for all our stakeholders
- We have a unique opportunity to contribute to the transition to a sustainable society and a sustainable economy
- As part of the 2020 Annual Report, we have begun to disclose ESG (Environmental, Social & Governance) ratios in order to increase transparency with respect to the Group's footprint in society
- The ESG ratios form part of our CSR reporting, in which we explain about our work on corporate responsibility, including on selected Sustainable Development Goals
- We plan to further develop products for our customers that support sustainable developments

The Faroese economy

The Faroese economy has seen significant growth in the past decade to the point where GDP per capita in 2019 surpassed that of Denmark. The main drivers of growth have been pelagic fisheries and aquaculture. The economy has also seen significant growth in its tourism industry until the COVID-19 pandemic. The Faroese economy has remained resilient throughout 2020 and is expected to rebound solidly in 2021.

The Greenlandic economy

The Greenlandic economy has grown steadily over the last decade, mainly driven by an increase in export volumes and prices. Greenland's economic cycles are stabilised by the fact that the Danish block grant accounts for about a third of its public sector budget. The country has significant opportunities for future growth in its upcoming airport capacity expansion and the nascent mining industry. The main challenges to growth are structural unemployment and a shortage of skilled labour.
